- No Nitrates
- No Enzymes
- No Silicates
- No Sulfates
- No chemicals

Not a Soap, Not a Detergent, Not a Petroleum Solvent!

Harsh Industrial Detergents and Flammable Solvents are no longer necessary for Superior Cleaning Effectiveness

## Go Natural

### Non-Toxic Cleaners

**Go Natural Cleaners** are versatile and powerful non-toxic plant-based cleaners that work differently to standard chemical based cleaners. The powerful cleaning action of **Go Natural** products penetrates stains, soiling and other contaminants freeing them from the surface so that they can be simply rinsed away with water or be wiped away without damaging or reacting with the surface or the user.

**Go Natural Cleaners** have many different applications. They can be safely used on a great variety of surfaces including furniture, carpets, equipment, chairs, desks, whiteboards, toys, machinery, walls, workshop floors and in many other applications where heavy soiling is present. **Go Natural** products can be also used in kitchens, offices, surgeries, hospitals, schools, day care, and most areas where general cleaning is required.

Some applications can be quickly removed by simply spraying & wiping away the contaminant. Where there are deposits, or build up of materials, it is best to spray **Go Natural Cleaner** onto the problem, allow it to dwell or work for a short while and then simply wipe or rinse away the soiling. The clean surface can then be lightly rinsed with water if needed. For heavy deposits allow extra time to penetrate.

**Go Natural Cleaners** are Non-toxic, Non-flammable, Non-carcinogenic, Non-aromatic, and have No VOCs. They are safe to use having NO Health or WorkSafe concerns. There are NO evidence of adverse effects if swallowed, inhaled or with skin contact & skin absorption. In fact, most **Go Natural** products can be used as hand cleaners. They are a slight irritant if splashed into the eyes which rinsing well with water will fix.

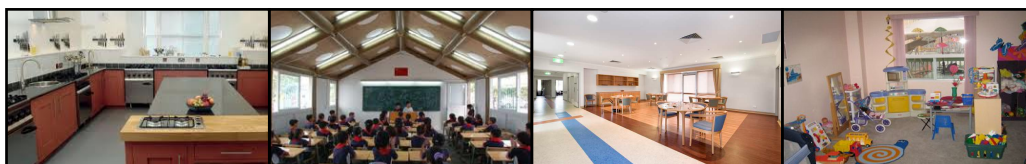

**Go Natural Cleaners** are formulated only from renewable, plant-based ingredients, some herbs and essential oils, and plant-based surfactants. They contain **NO artificial fragrances, dyes, phosphates, caustics, salts, acids, glycol ethers, terpenes, phenols, butyls or petroleum distillates**. **Go Natural Cleaners** are totally and readily biodegradable & environmentally safe. They can be safely disposed of down drains or onto the ground without harming the environment. **Go Natural Cleaners** are safe for waterways, septs, grey water systems and are completely groundwater safe.

### APPLICATIONS

<ul style="list-style-type: none"><li>• Day care</li><li>• Hospitals</li><li>• Food Processing</li><li>• Schools</li></ul>	<ul style="list-style-type: none"><li>• Automotive</li><li>• Marine</li><li>• Equipment Maintenance</li><li>• Tools</li></ul>	<ul style="list-style-type: none"><li>• Office Cleaning</li><li>• Concrete Floors</li><li>• Carpets &amp; upholstery</li><li>• Furniture</li></ul>
--	---	--

### Go Natural products:

- Actually work!
